

2016-2017 Annual Membership General Meeting
President's Report
May 13, 2017

Personal developments:

I had been suffering severe back pain for several years which restricted my ability to do much public speaking and conduct public meetings. I had surgery in January 2017, which really put me out of commission for a few months.

I have tried very hard to maintain my support for all SCRID activities and the leadership during this time. This includes a very "interesting" Region V video conference a couple of days before my surgery.

I wish to thank SCRID's amazing leadership and members for bearing with me while I went through the surgery and recovery. Your support and good thoughts/wishes made all the difference in my standing before you today!
